2014 – Present ReinventStrategies, Long Island, NY
Web Developer
Planning, designing and maintaining websites emphasizing functionality, site layout, and creativity while collaborating closely with the client. Crafting organized content and user-friendly design with easy navigation that may include email templates, slideshows, theming, and more. Understanding feature requirements and recommending workable solutions from a technology view to meet expectations while keeping development time within the budgeted schedule. Monitoring website performance and capacity for quality and efficiency. Creating promotion for client websites using Google Adwords, Analytics.

2013 – 2014 ReliantTech, Holmdel, NJ
Web Application Developer
Managing and updating websites for Jenni USA and parent company Reliant Technology, working closely with the marketing department to create a better design. Administering software application updates and enhancements while developing new systems to bring the corporate sites to the most current standards. Handling integration with systems such as Alfresco, Jaspersoft, SharePoint, and other tools that will enhance the software product suite. Maintain and building the corporate site with Joomla CMS.

2009 – 2011 eFashionSolutions, Secaucus, NJ
Junior Web Developer / Design
Assisted with creative design for the website, based on brand guidelines and client direction for site banners, affiliate marketing campaigns, email blasts, and flash sale promotions. Designed landing pages and email addresses. Created content that converted visitors to purchasers. Helped design websites that were user-friendly and maintained functionality of the website. Designed web campaigns for online initiatives, editorials, email blast, banners & creative material. Tested websites for functionality in different browsers & at different resolutions. Collaborated with designers, programmers and clients. Consulted on best practices for interactive usability standards and outlined potential functionality during the internal creative discovery phase.
